Interagency Group/Counterintelligence
Washington, D.C. 20505

APR 25 1983

MEMORANDUM FOR: William J. Casey
Chairman, Senior Interagency Group (Intelligence)

FROM: William H. Webster
Chairman

SUBJECT: Guidelines for the Maintenance of
Counterintelligence Data Bases

1. Attached herewith is a study which the IG/CI directed its Secretariat to accomplish dealing with an evaluation of the pros and cons of a central counterintelligence data base, an assessment of current counterintelligence records systems, and proposals for improvement of that current records situation. The study does not encompass counterintelligence analytical issues.

2. The study has been reviewed and approved by the IG/CI for forwarding to the SIG(I). Five actionable consensus recommendations are detailed in pages 17-20. They are all supported by the IG/CI except for the National Descriptive Inventory, discussed in a subparagraph on pages 17 and 18, which is not recommended. With respect to the fifth recommendation, detailed discussion of which appears on pages 19 and 20, the FBI committed itself to periodically produce a report on hostile HUMINT targeting against the United States drawing on all pertinent information available to the Bureau, and to be responsive to special agency requests such as by DIA/CI.

3. I am prepared to follow up on this report and its recommendations after the SIG(I) has acted, and will use the IG/CI and/or ad hoc working groups, as appropriate, to accomplish this.

William H. Webster
